

## WHY THE

# GREEN NEW DEAL IS BAD FOR AMERICA

**WHILE DEMOCRATS CALL IT A CLIMATE BILL**, the Green New Deal has nothing to do with reducing global emissions or cleaning up the environment.

**INSTEAD, IT USES "CLIMATE" AS A JUSTIFICATION** for a socialist takeover of the American economy -- with everything from mandating 100% green energy to upgrading every building in America to guaranteed income and one-size-fits-all, government-run health care. All at an incredible cost to the American people.

**OVER 10 YEARS, THE ESTIMATED PRICE TAG FOR THE GREEN NEW DEAL IS UP TO \$93 TRILLION.**

- Low Carbon Electricity Mandate will cost \$39,000 per household
- Guaranteed Green Housing will cost up to \$12,000 per household
- Guaranteed jobs will cost up to \$322,000 per household
- Socialized Medicine will cost \$260,000 per household

**THIS MEANS THAT THE GREEN NEW DEAL COULD COST** every American household nearly **\$65,000 EACH YEAR** -- much higher than the average family income. If Democrats enact this socialist agenda, it would hurt low-income Americans the most.

**AND FOR ALL THIS COST**, the Green New Deal is only focused on our emissions here at home. But the U.S. has already reduced emissions more than the next 12 countries combined -- all while China continues to increase emissions.

**IF DEMOCRATS WERE SERIOUS ABOUT CLIMATE CHANGE**, they would partner with House Republicans on focused solutions that make American energy cleaner, more affordable, and more accessible to reduce emissions around the world.
